- Initial release of documentation.

Client Skin Pack Addition

Preparation

To set install the Beam Client Skin Pack Addition, you must have:

- Access to the Qumu Video Control Center application server
- Ability to update the current skin pack

Backup

The installer creates a new version of the Qumu skin pack file located at **/js/dojo18/mpi/layers/vp_program.js**. It is unlikely that your custom skin pack also modifies this file, however it is recommended that you backup your skin pack directory prior to installation. The directory is typically located at:

```
C:\Program Files\Qumu\tomcat\base\webapps\viewerportal\WEB-INF\skinresources\custom
```

Installer

1. Copy the installer file (named **beam-client-installer.v.1.5.6.exe** or similar) to the desktop of the VCC application server.

2. Double-click on the installer file, locate the Qumu VCC directory, enter the Qumu Viewer portal domain, and the Beam Cluster hostname, then click **Install**.

3. Click **OK** to confirm the information dialog.

4. Navigate to the skin tools form and create a new skin pack. If the Viewer Portal hostname were **qumu.example.com** and the domain were **tube**, the skin tools URL would be:

`https://qumu.example.com/viewerportal/tube/skintools.vp`

5. Remove the installer file from the Desktop.

Web Interface

Preparation

To set install the Beam Web Interface, you must have:

- Access to the Qumu Video Control Center web server
- Ability to update Microsoft IIS settings

System Requirements

Supported Platforms

- Qumu VCC 7.5 and later
- Microsoft IIS 7.5 and later

Installer

1. Copy the installer file (named **beam-web-installer.v.1.5.6.exe** or similar) to the desktop of the VCC web server.

2. Double-click on the installer file, enter the Beam Cluster hostname, then click **Install**.

3. Click **Close** when the installation is complete.

- To confirm the installation, open **IIS Manager** and look for the **/adminportal/beam** virtual directory in the **Default Web Site**.

- Remove the installer file from the Desktop.
